

Not everyone has been naturally gifted with a strong sense of aesthetic and music talent. A Mother might share her unconditional love for Music, a Daughter might start to play the piano really early... This is the way Alice was blessed and since then, her artistic and creative mind has been haunted by delicate melodies, vivid poetry and true passion.

It seems that often, while sitting behind a piano, the academic way does not attract the Artist. But quite the opposite. A true Artist will give birth to a completely intimate World, created from the depth of his soul. A true Artist will find the perfect amount of subtlety and sensibility that will get right under your skin. Your senses and perception will then be changed forever.

Alice Torrent IS this true Artist, because her passion and love for music is real. Her songwriting is the perfect mix of melancholy, darkness and softness. Her alternative Folk Rock is intense but delicate, bringing a heightened degree of emotional introspection. Her beautiful voice, raw feelings, and intense live performance are making her flirting with no shame with the biggest names of the genre.

Make sure to remember this name – Alice Torrent – she will be hitting the road very soon to introduce her fascinating and mesmerizing first release, “Phantom Limb”, to the masses. Be ready!
